FOR IMMEDIATE RELEASE

Cable Bahamas Appoints Sheldon Mundle as Group Chief Information Officer

Seasoned global technology executive brings more than 25 years of experience in enterprise transformation, digital modernization, cybersecurity and technology operations

NASSAU, BAHAMAS – Cable Bahamas Ltd. today announced the appointment of Sheldon Mundle as Group Chief Information Officer (CIO), further strengthening the company's executive leadership team as it continues to advance its digital transformation, operational modernization and customer experience priorities.

Mundle is a global technology executive with more than 25 years of experience leading enterprise transformation, digital modernization and large-scale technology operations across telecommunications, consulting, financial services and Fortune 500 environments. He has held senior leadership roles at major organizations including Ernst & Young, KPMG, Bank of America and telecommunications providers in the Caribbean region.

"Sheldon brings the depth of experience, strategic discipline and transformation mindset required to help guide Cable Bahamas through its next chapter of technology-enabled growth," said Chief Executive Officer Franklyn Butler II. "His proven ability to connect technology strategy with business performance will be invaluable as we continue to modernize our operations, strengthen resilience and deliver greater value to our customers, shareholders and stakeholders."

As CIO, Sheldon will lead Cable Bahamas' enterprise technology strategy, with responsibility for strengthening technology operations, advancing cybersecurity, supporting cloud modernization, enabling artificial intelligence capabilities, and aligning technology delivery with the company's broader business objectives.

His appointment comes as Cable Bahamas continues to invest in the systems, platforms and digital capabilities required to support growth across its group of companies, improve operational efficiency and deliver better experiences for customers.

Sheldon is recognized for bridging technology and business strategy to improve operational efficiency, customer experience, revenue growth and organizational scalability. His areas of expertise include technology strategy, operational transformation, enterprise delivery, cybersecurity, cloud modernization, AI enablement and business alignment.

“I am honored to join Cable Bahamas at such an important stage in its evolution,” said Sheldon. “Technology is central to how we serve customers, empower teams, strengthen operations and unlock future growth. I look forward to working with the leadership team and colleagues across the organization to help advance Cable Bahamas’ transformation agenda and support its continued impact across The Bahamas.”

In addition to his corporate leadership, Sheldon is active in the Atlanta technology community through board and nonprofit leadership roles, including the Technology Association of Georgia and technology-focused community organizations.

Cable Bahamas said the appointment reflects its continued commitment to building a future-ready organization supported by strong leadership, modern systems and a clear focus on innovation, resilience and service excellence.

About Cable Bahamas

Founded in 1995, Cable Bahamas Ltd. (CBL) is the first Bahamian-owned communications provider to offer ‘triple play’ services, delivering broadband internet, cable TV, and fixed-line calling to 99% of The Bahamas. Publicly listed on BISX, CBL serves residential and corporate customers and is the controlling shareholder of BeALIV Limited, the nation’s second mobile licensee. The company is led by Franklyn A. Butler II, its first Bahamian Group CEO & President
