CHAIRMAN'S REPORT ON UNAUDITED RESULTS MARCH 31, 2022

The economy of The Bahamas continues to pivot away from the extraordinary Covid-19 pandemicrelated activities and government initiatives. Work hours have also improved for many Bahamians, particularly those in the hotel and leisure sectors. Accordingly, the Bank is seeing the shift toward normalized banking for its loans and deposits customers. For the three months ended March 31, 2022, the Bank recorded a consolidated net profit of \$30.4 million compared to a consolidated net loss of \$2.7 million for the same period in the prior year.

The primary contributor to the consolidated net profit has been the reversal of impairment expense recognized in the prior period. This reversal of impairment losses is supported by the recovery and growth of The Bahamas economy during the period as the level of uncertainty and risk arising from the COVID-19 pandemic decreased significantly. Additionally, as more of our customers experience increased work hours, the Bank's credit risk has declined and there is an improvement in the credit quality of the Bank's loan portfolio. The Bank has a \$17.4 million reversal of the loan impairment expense year-to-date, as compared to the same period in 2021, which reflected a loan impairment expense of \$20.7 million.

The Bank maintains a well-diversified loan portfolio as it continues to focus on organic growth, asset quality and applying appropriate allowances for loan losses. We continue to grow our business through a long-term disciplined approach, maintaining a strong level of liquidity (available cash and unencumbered high-quality liquid assets), which positions us well to adapt to the stresses posed by this business environment. The Bank's liquidity ratio of 55% is well above the regulatory limit of 20% required by the Central Bank.

Additionally, under our capital plan, the Bank operates with a level of capital well above regulatory established capitalization limits. The Bank's capital adequacy ratio is over 30% compared to the Central Bank's requirement of 17%.

During the quarter the Bank paid quarterly dividends of 1 cent per share bringing total dividends paid for the year-to-date to \$2.9 million.

We are encouraged by the latest projections for GDP growth and the rebound in room occupancy levels and airlifts related to the recovering demand for The Bahamas as a tourist destination. We continue to see the economic risks lessen; however, downside risks still exist given the ongoing Covid-19 pandemic, global supply chain disruptions, elevated levels of inflation, the stress on government finances, and potential further disruption to business activity arising from the war in Ukraine. The Bank navigates these impacts by effecting business leadership that adheres to the core principles and values that have supported our growth and success, and by continuing to follow our community banking model.

I remain inspired by the commitment of the Bank's team to excellence despite challenging circumstances and extend gratitude to our shareholders, staff and customers for their continued, unwavering support.

William B. Sands, Jr. **Executive Chairman**
